# Client Profile

**From The Company Website:**

The International Forum on Teaching Legal Ethics and Professionalism website is designed as an online gathering place, resource repository, and clearinghouse for an international community of ethics teachers, scholars, and practitioners. The website provides an organizing tool for efforts to change the culture of legal education and to increase the emphasis on ethics and professionalism education across jurisdictions and throughout law schools' curricula.

# Client's Challenge

**01** teachinglegalethics.org is a Drupal 6 site. Support for Drupal 6 has been terminated on February 2016 and many modules were no longer functional, as the APIs didn't exist.

**02** The client required the site to perform better and responsive (mobile-first approach) because of increase in userbase accessing the site from mobile phones.

**03** Broken modules on the site to be fixed. Non-Drupal standard codes to be made standard.

# Client's Need

The client's needs were two-fold:

**01 Immediate:**

**A)** Performance of the site should be consistent when accessed from different devices such as a laptop, mobile, and tablet.

**B)** Critical Security updates.

**02 Long Term:**

**A)** Easy access for the user.

**B)** Monthly maintenance plans to fix issues and run updates as needed.

**C)** Planning and adding new features to the site.

# How We Fixed The Client's Problem

**01** Drupal Partners identified the immediate needs of the client and addressed them.

**02** When upgrading to Drupal 8, non-standard codes were all standardized and junk data were cleared as well.

**03** We included Captcha to avoid account spamming.

**04** The important security patches and major updates were completed and the site was fully feature-tested to ensure that everything was working correctly

**05** We have fine-tuned the server.

**06** We also added new features and worked on performance improvements for the site.

# Impact On The Client's Business

**01** Site's performance improved by 3x. Search accuracy is 100%.

**02** Mobile userbase has increased exponentially which is almost 3x than before.

**03** Handling and managing content is now easier than before.

**04** The site is now fully functional as dysfunctional modules have been replaced.
